

Cerullo Fire Protection is a second generation family owned and operated company. Founded by Charles Cerullo in 1993, Cerullo Fire Protection has now grown to be one of the largest and most trusted fire protection contractors in New Jersey, performing all types of fire protection design, maintenance, inspection and installation including fire extinguishers and kitchen systems. Now run by his son, Kevin, emphasis on family and customer service is our top priority.

Our goal is to exceed the expectations of our customers and our success has allowed Cerullo Fire to grow into virtually every township in the State of New Jersey; allowing for highly competitive pricing and rapid response time.

With over 20 vehicles on the road and 24 –hour emergency service, you are guaranteed a quick and reliable repair.

Our staff consists of highly trained technicians, designers and project managers, all of whom have at least 20+ years experience in their respective professions. We welcome the opportunity to provide a free quote for all of your fire protection needs.

Cerullo Fire Protection is licensed with the State of New Jersey and registered as a Small Business Enterprise, a member of the Better Business Bureau and National Fire Protection Association, approved with the New Jersey School Construction Development Authority including classification with the DPMC and certified with the State for the Public Works Contractor Registration Act. We are qualified and certified for all of your fire protection needs.

# CUSTOMER SERVICE

With the stakes so high, it is essential to choose a reliable fire protection company that you would literally trust for your family.

**24 Hour Emergency Service** – Emergencies do not only happen during normal business hours. Cerullo Fire Protection has a 24 hour/ 7 day a week (including holidays) emergency service; you will reach a live operator guaranteeing immediate emergency response. We have built our reputation on this.

**Experienced Technicians** - All technicians have completed a 5 year course which includes classroom and field training. Along with constant updates, classes on new procedures, products and code changes, Cerullo Fire Protection assures you are getting the best service in the business. With each technician having an average of 20 years field experience, we will diagnose and repair your system quickly and accurately the first time.

**Inspection Reports** - Cerullo Fire Protection uses the most updated NFPA approved paperwork for all inspections. Whether this paperwork is requested by a tenant, owner, fire official or insurance company, there will never be any lost time on receiving the proper paper backup. Our reports will be left onsite upon completion of the inspection along with a back up left on file in our system.

**Management** – With our highly trained and skilled managers, all projects are handled in a professional manner. We have onsite foreman, project managers and office management to assure that every phase of your project moves along smoothly. While Cerullo is large enough to handle any of your fire protection needs, we value each customer as part of our family.

**Flexible Scheduling** – Cerullo Fire Protection fully understands the impact that necessary repairs could have on your business and production. We will work with you to find the best solution to minimize the impact on your business.

**One Stop Shopping** – Cerullo Fire Protection wants to make sure that your fire protection needs are kept up to date as easy as possible. Any inspection, question, or repair takes one call to our main office. Our receptionist will direct your call to the proper manager and have it scheduled immediately. Call us now at 732-388-1949.

# DESIGN & ENGINEERING

Our team of designers each have over 20 years of experience in this field. All designs are overseen by a NICET III certified designer, one of the most accredited certifications in our industry, along with a former DCA Plan Reviewer. We use only the most advanced AutoCad software helping us to provide the best and most cost effective systems for our clients. All of our plans are signed and sealed by a Professional Engineer prior to being submitted to the town official for approvals.

-  Our design department has over 60 years of experience.
-  We submit design and permit applications to the local jurisdiction and follow up step by step with the approval process.
-  We understand that each project presents a unique set of challenges that demand our expertise.
-  Design follows our in-house quality assurance standards.
-  Our design team can accommodate any system whether it is a system in a historic building, a high-end apartment or a commercial application. We continue to work with our clients to provide a system with their expectations and approval in mind.
-  On-site coordination.
-  Work with the Authority Having Jurisdiction to ensure that all of our designs meet local code.
-  Engineering site survey for fire protection density, calculations as required by town and insurance carrier.
-  With codes constantly changing and requirements from insurance carriers being even more stringent, let Cerullo Fire Protection take care of all of your design criteria.

Below are just some examples of our design projects.

- |   |   |
|---|---|
|  Shopping Malls                |  Parking Structures |
|  Department Stores             |  Bridges            |
|  Office Buildings              |  Schools            |
|  Institutional Buildings       |  Ferry Terminal     |
|  High Rise Apartment Buildings |  Data Centers       |

 And Many More...
